

NEWSLETTER

of the WISCONSIN ENTOMOLOGICAL SOCIETY

Volume 25, Number 1

May 1998

NEXT MEETING TO BE AT UW-OSHKOSH ON JUNE 13

The next meeting of the Wisconsin Entomological Society will be held on Saturday, June 13 at the UW-Oshkosh Campus. It will begin at 1:00 PM in room 260 of the Halsey Science Center. From Highway 41, exit onto Highway 21 East (also called Omro Road) which connects to Oshkosh Avenue. Take Oshkosh Avenue across the bridge and turn right on High Avenue, which runs thru the campus. Turn left on Woodland Avenue and go two blocks to the corner of Woodland and Elmwood. Halsey Science Center is on the corner. Parking is available in lot numbers 11, 17, 25, 27 and 29, all nearby (see map on back of Newsletter).

Anita Carpenter will present a slide show featuring her outstanding insect photos. Beside having winning entries in the WES Photo Salon, her work has appeared in Wisconsin Natural Resources magazine. She will also discuss a new state record dragonfly (*Williamsonia lintneri*) she documented four years ago but was just recently identified. Les Ferge will give a presentation on moth survey highlights of the past few years. The UW-Oshkosh insect collection will also be open for viewing.

ANNUAL MEETING NOTES

"Election" of officers took place at the annual meeting last December. Since there were no new nominations or volunteers, last year's officers were voted in for another term. The officers for 1998 are: President, Phil Pellitteri; Vice-President, Gene Drecktrah; Secretary, Carol Ferge; and Treasurer, Tom Rocheleau. The winning entries in our Annual Photo Salon appear on the next page.

1998 DUES NOTICE

Enclosed in this Newsletter is your dues envelope for 1998. Your prompt attention will be most appreciated. Dues are to be sent directly to the Treasurer, Tom Rocheleau, 3100 Buena Vista St, Madison, WI 53704. To determine your status, please check the address label on this Newsletter. Appearing after your name will be the last year dues are paid for and your membership category (Individual, Family, Sustaining or Patron). Also be sure to notify us of any address changes or corrections when you send in your dues, or notify us at the address below.

The Newsletter of the Wisconsin Entomological Society is published twice a year. It is provided to encourage and facilitate the exchange of information by the membership, and to keep the members informed of the activities of the organization. Members are strongly encouraged to contribute items for inclusion in the Newsletter. Please send all news items, notes, new or interesting insect records, season summaries, research requests, and report any address changes to the editor: Les Ferge, 7119 Hubbard Avenue, Middleton, WI 53562. e-mail lesferge@juno.com

ELFIN SKIMMER - KARL LEGLER (1st place)

SATYR ANGLEWING - LES FERGE (2nd place)

PROMETHEA MOTH - JANICE STIEFEL (3rd place)

1997 WISCONSIN LEPIDOPTERA SEASON SUMMARY

Coordinator: Les Ferge (LAF). Contributors: Robert J. Borth (RJB), Mathew Brust (MB), James E. Ebner (JAE), James J. Kruse (JJK), Karl and Dorothy Legler (KDL), James C. Parkinson (JCP), Tom Rocheleau (TR), Janice Stiefel (JS), Ann & Scott Swengel (SAS). Determinations provided by George J. Balogh (GJB), Eric H. Metzler (EHM) and Mogens C. Nielsen (MCN).

The season was slow to get underway due to cool spring weather, but warmed abruptly in early June. Many spring species appeared later than average. Summer weather was uneventful, with moderate temperatures and rainfall. Mild conditions continued well into October, with the season ending by 1 November. The Swengels reported a good year for Monarchs, which were present from 31 May (Sauk Co.) through 20 October (Wood Co.), and Ebner found them common to abundant all through September. A few migratory butterfly species appeared, with single individuals or small numbers of *Eurema lisa*, *Nathalis iole*, *Euptoieta claudia*, *Vanessa cardui* and *Junonia coenia* being recorded in southern counties later in the season. *Noctua pronuba*, an introduced European Noctuid, continues to spread, and is now known from three counties.

THE NABA-XERCES FOURTH OF JULY BUTTERFLY COUNT, 1997

The 23rd annual NABA-Xerces Fourth of July Butterfly Count was held in the summer of 1997 and sponsored by the North American Butterfly Association (NABA). Participants in the count conducted a one-day census of all butterflies observed at sites within their count area, a 15-mile diameter circle.

In 1997, 331 counts were held, including one received after the deadline to be published in next year's report. This was a 4% increase from the 318 held in 1996 (including 13 being published in the 1997 report). This continues the pattern of slowing growth in recent years, as the increase was 7% from 1995 to 1996, 17% from 1994 to 1995, and 15% from 1993 to 1994. Still, in the last five years, the program has increased from 221 to 331 counts, a 50% increase! Another milestone just achieved this year was our blast past 1000% growth since the original 29 counts in 1975.

The 293 counts in the U. S. (up from 285 in 1996) occurred in 43 states (counting DC as a state), down slightly from 45 states in 1994-1996. Nevada is the only state that has never had a count. The 33 Canadian counts (up from 29 in 1996-1996) occurred in six provinces (up from 5 in 1995-1996). Mexico set a new record for counts, with 5 in 1997 (4 in 1996, 2 in 1995) in three states. As in 1996, three counts continued their perfect attendance record of reporting in each year of the count program, now 23 years (Berkeley, CA, Gilpin County, CO and Lower Pearl River, LA-MS).

With 23 counts in 1997 (19 in 1996), California has advanced its lead over all other states and provinces. Florida moved up the ranks to second, with 19 counts (15 in 1996), followed by New York, which tied for second last year but slipped too third in 1997, with 18 counts, the same as in 1996. Texas has momentarily dropped out of contention, declining to 10 counts from 18 in 1996. But a number of other states and provinces are close behind, with 16 counts each from Michigan, Ontario, Virginia and Wisconsin.

As usual, the counts with the greatest species diversity were in Mexico, which averaged 116 species, a minimum of 90 and a maximum of 154, just shy of the 1992 record of 169 species. Honors for most species on a count north of Mexico continued between Arizona and Colorado in 1997. The four Arizona counts averaged 70.5 species, with a maximum of 102 on the Ramsay Canyon count. The seven Colorado counts averaged 48 species, with a maximum of 101 on the Gilpin County count. Gilpin County, CO holds the record of 103 species in 1994. Two Arizona counts hold second place, with 102 species at Ramsay Canyon in 1995 and 1997 and Patagonia in 1992.

To order the 1996 report (specify reports desired for previous years), please send a check or money order payable to NABA for \$9.00 (NABA members) or \$13.00 (non-members) for each report (includes postage) to: **4th of July Butterfly Count, 909 Birch Street, Baraboo, WI 53913**. For more information on NABA, the count program, how to conduct a count, and counts in your area, please write, including a self-addressed, stamped business envelope to: **NABA, 4 Delaware Road, Morristown, NJ 07960**.

NATURAL HISTORY WORKSHOPS: The UW-Milwaukee Field Station' Natural History Workshops offer an opportunity to study focused topics at college-level instruction under the guidance of noted authorities. Most workshops present two full days of instruction, housing and meals are available at the station. Enrollment in each session is limited to 20, the atmosphere is informal and instruction is individualized. Workshops may offer options for college credit, or Continuing Education Credits. Fees vary. The following workshops are being offered:

Methods for Description of Vegetation - Dr. Jim Reinartz - 18-22 May 1998

Small Mammal Trapping & Handling - Nicola Anthony & Richard Bautz - 29-30 May 1998

Fishes of Wisconsin: Identification & Ecology - Dr. Tim Ehlinger - 10-11 July 1998

Mosses: Identification & Ecology - Dr. Frank Bowers - 17-18 July 1998

Grasses: Identification & Ecology - Dr. Robert Freckmann - 14-15 August 1998

Wetland Delineation - Don Reed - 21-22 August 1998

Geology of Southeastern Wisconsin - Dr. William Kean - 6-7 November 1998

If you would like to participate, please write or call for additional information:

Dr. James A. Reinartz, UWM Field Station, 3095 Blue Goose Road, Saukville, WI 53080

Phone (414) 675-6844 Fax (414) 675-0337 e-mail: jimr@csd.uwm.edu

MONARCH WATCH is a cooperative network of students, teachers, volunteers and researchers dedicated to the study of the biology and migration of the Monarch Butterfly, *Danaus plexippus*. Monarch Watch participants are involved in tagging of migrating Monarchs, maintaining migration journals, rearing Monarchs for classroom projects and planting milkweed and butterfly gardens. Tagging is the principal activity, with an estimated 49,000 Monarchs tagged by members in 1996. For more information or membership application, contact:

Monarch Watch, c/o O. R. Taylor, Dept. of Entomology, Haworth Hall, University of Kansas,

Lawrence, KS 66045 phone toll-free 1 (888) TAGGING e-mail: monarch@ukans.edu
